Portland cement clinker

The product contains chromate reducing agent. If the storage conditions are not appropriate or the storage period is exceeded, the effectiveness of the reducing agent can diminish, and the cement can become skin sensitising. Cement dust may cause an allergic reaction in some individuals due to the water soluble Cr(VI) content.

Quartz (SiO₂)

Prolonged and/or massive inhalation of respirable crystalline silica dust may cause lung fibrosis, commonly referred to as silicosis. Principal symptoms of silicosis are cough and breathlessness.
